Revised Attachment 3:

Comprehensive, Age Appropriate, Evidence-Based, and Medically Accurate Sexuality Education Programs

Component A

Revised Attachment 3: From "What Works 2009 Curriculum-Based Programs That Prevent Teen Pregnancy" National Campaign To Prevent Teen and Unplanned Pregnancy http://www.thenationalcampaign.org/resources/pdf/pubs/whatworks09.pdf

List of Effective Programs

- 1. * All4You!
- 2. * Aban Aya Youth Project
- 3. * Becoming a Responsible Teen
- 4. * Be Proud! Be Responsible!
- 5. * Children's Aid Society (CAS)- Carrera Program
- 6. * ¡Cuidate!
- 7. * Draw the Line/Respect the Line
- 8. * Focus on Kids
- 9. * Focus on Kids plus ImPACT
- 10. Get Real about AIDS (Quasi-Experimental)
- 11. Healthy Oakland Teens (Quasi-Experimental)
- 12. * HIV Prevention for Adolescents in Low-Income House Developments
- 13. * Keepin' It R.E.A.L.!
- 14. Learn and Serve America (Quasi-Experimental)
- 15. * Making a Difference! An Abstinence-Based Approach to HIV/STD and Teen Pregnancy Prevention
- 16. * Making Proud Choices! A Safer Sex Approach to HIV/STD and Teen Pregnancy Prevention
- 17. * McMaster Teen Program
- 18. Poder Latino: A Community IDS Prevention Program for Inner City Latino Youth (Quasi Experimental)
- 19. * Positive Prevention
- 20. * Postponing Sexual Involvement, Human Sexuality, and Health Screening Curriculum
- 21. Postponing Sexual Involvement (PSI) and Human Sexuality (Quasi-Experimental)
- 22. * Reach for Health Community Youth Service (RFH-CYS)
- 23. * REAL Men
- 24. Reasons of the Heart (Quasi-Experimental)
- 25. Reducing the Risk (Quasi-Experimental)
- 26. Rochester AIDS Prevention Project (Quasi-Experimental)
- 27. * Safer Choices
- 28. Seattle Social Development (Quasi-Experimental)
- 29. * SiHLE (HIV Prevention Intervention)
- 30. * Teen Outreach Program

^{*} As a general manner, programs that have been evaluated using an experimental design provide stronger evidence of effectiveness than those using a quasi-experimental design. Programs evaluated using an experimental design are noted with an asterisk.

Note that some programs listed below may not be currently available for purchase (August 2010).

Program Information

Aban Aya Youth	Cost: \$660, \$375 download, \$150-200 individual grade level packages
Project	Audience: Urban African American youth grades 5 through 8. May be used in community based organizations that
	provide services to youth in this age group.
	Main Message: This Afro-centric program was developed to address multiple problems behaviors such as violence,
✓ Middle school,	substance abuse, delinquency, and sexual risk taking simultaneously in a long-term intervention by encouraging
with community	abstinence, protection from unsafe sex, avoidance of drugs and alcohol, and conflict resolution.
component	Length: 16-21 lessons during each school year, grades 5-8. Lessons are 40-45 minutes.
	Group Size: Classroom
	Components: Classroom component (16-21 lessons per year; community component (homework and training for
	parents, teacher, staff; peer mentoring; community outreach).
	Evaluation findings: No significant intervention effects for girls. Boys reported increased condom use and
	decreased sexual intercourse (as well as additional non-sexual behavior effects seen in multiple arenas).
	Information: http://www.socio.com/passt24.php
	HHS fact sheet: http://www.hhs.gov/ophs/oah/prevention/research/programs/aban aya youth project.html
Adult Identity	Cost: Implementation kit: \$240; facilitator certification (\$2,500 – 4,500 plus travel) and licensing fee (needs to be
Mentoring (Project negotiated); information: Leslie Clark lclark@chla.usc.edu	
AIM) Audience: Middle school students	
	Main Message: Designed to promote abstinence, delay the initiation of sex, and decrease the intention to engage
✓ Middle school	in sex. Helps adolescents form their "adult identity" by helping them to articulate their future goals and think
	about how risky behavior choices might jeopardize those goals.
	Length: 10-session curriculum, 1-2 days per week over 6 weeks
	Group Size: Classroom
	Components: 4 units with exercises and discussion. Program facilitators required to participate in 3-day training.
	Evaluation findings: At 19 week follow-up, participants less likely to report having had sexual intercourse. At 1-
	year follow-up the effect held for boys only. (Group evaluated was 98% African American.)
	Information: HHS fact sheet:
	http://www.hhs.gov/ophs/oah/prevention/research/programs/adult_identity_mentoring_project_aim.html
	Child Trends fact sheet: http://www.childtrends.org/lifecourse/programs/aim.htm

All4You! Cost: Currently not available for purchase. For information contact Karin Coyle, Ph.D., Senior Research Scientist, ETR Associates at karinc@etr.org. ✓ Alternative Audience: In-school program evaluated with teens in alternative schools; the intervention also included a service school learning component; urban setting classroom plus Main Message: Program was designed to reduce the risk of HIV, other sexually transmitted disease and communityunintended pregnancy among high school-aged youth who are attending court and community alternative schools. based service-Classroom lessons were drawn from the Be Proud! Be Responsible! curriculum and the Safer Choices curriculum. learning Length: 14 sessions over 6-8 weeks (about 26 hours total) Group Size: Classroom Components: Classroom behavioral skills development and community involvement/service-learning. Evaluation findings: Six months after the program ended program participants reduced frequency of intercourse and increased condom use. Information: Description: http://www.childtrends.org/lifecourse/programs/all4you.htm http://programservices.etr.org/index.cfm?fuseaction=Projects.summary&ProjectID=16 HHS fact sheet: http://www.hhs.gov/ophs/oah/prevention/research/programs/all 4 you.html Assisting in Cost: An intervention package is not available at this time. For information contact Dr. Janet S. St. Lawrence, **Rehabilitating Kids** ilawrence@meridian.msstate.edu (ARK) Audience: Substance-dependent adolescents in residential treatment facilities; mixed gender Main Message: Program was designed to increase abstinence, increase safer sex, and reduce risky sex behaviors in substance-dependent youth. Based on Becoming a Responsible Teen. Residential settings (drug Length: 12 sessions, 90 minutes each treatment) Group Size: Small groups Components: Prevention information; behavior skills sessions; motivation session/emotion-based risk-sensitization manipulation. (In last session, photos of participants are digitally altered to depict end-stage AIDS.) Evaluation findings: At the 6- and 12-month follow-ups, participants were significantly more likely to report being abstinent in the previous 30 days. Information: CDC: http://www.cdc.gov/hiv/topics/research/prs/resources/factsheets/ARK.htm HHS fact sheet: http://www.hhs.gov/ophs/oah/prevention/research/programs/assisting in rehabilitating kids.html Be Proud! Be Cost: \$358 program package (written curriculum, activity set, videos), \$145 without videos Responsible! Audience: African American, white, and Latino adolescents age 13-18 (Note: evaluated only with African Americans, but has been used with diverse groups) ✓ Middle schools Main Message: Curriculum is intended to delay initiation of sex among sexually inexperienced youth, to reduce High schools unprotected sex among sexually active inner-city youth, and to help young people make proud and responsible ✓ Communitydecisions about their sexual behaviors. Emphasizes sense of community, accountability, and pride: protecting based settings families and community. Focus is on HIV/AIDS. Length: Six 1-hour modules. Group Size: Designed for 6-12 participants; has been implemented with larger groups Components: Multi-media, interactive curriculum addressing information, perceptions, beliefs, skills. Training available on fee-for-service basis from ETR. Evaluation findings: First study (all African American males): at 3-month follow-up, participants reported fewer female sexual partners, greater use of condoms, reduced sexual intercourse, reduced heterosexual anal sex. Second study: At 6-month follow-up, participants (all African Americans, mixed gender) reported reduced unprotected sex and anal intercourse. Information: http://www.etr.org/recapp/index.cfm?fuseaction=pages.ebpDetail&PageID=1&PageTypeID=2 http://selectmedia.org/customer-service/evidence-based-curricula/be-proud-be-responsible/ HHS fact sheet: http://www.hhs.gov/ophs/oah/prevention/research/programs/be_proud_responsible.html Be Proud! Be Cost: Program materials are available by contacting Deborah Koniak-Griffin, RNC, EdD, FAAN, UCLA School of Responsible! Be Nursing at dkoniak@sonnet.ucla.edu. Protective! Audience: Adolescent mothers or pregnant girls (7-12 grade) Main message: An adaptation of Be Proud! Be Responsible!, this curriculum emphasizes maternal protectiveness Middle schools as well as sexual responsibility and accountability. Increases awareness of effects of HIV/AIDS on communities and High schools children. ✓ Community-Length: Four 2-hour modules based settings **Group Size:** 6-12 participants Evaluation findings: At the 6-month follow-up, participants (predominantly poor, with Latina background) reported having significantly fewer sexual partners in the previous 3 months. Information: HHS fact sheet: http://www.hhs.gov/ophs/oah/prevention/research/programs/be proud responsible protective.html

Becoming a	Cost: \$280 (basic set). 2-day educator training available from ETR on fee-for-service basis.
Responsible Teen	Audience: African American adolescents age 14-18. (Program has also been used, but not evaluated, with diverse
,	populations.)
	Main Message: Program provides teens with HIV/AIDS prevention information and training on
✓ Community-	communication/negotiating skills regarding sex. Abstinence is the best way to prevent HIV infection, but other
based setting	preventative measures such as condom use are also important.
✓ Middle schools	Length: Weekly 90-120 minute sessions over 8 weeks
✓ High schools	Group Size: 5-15 participants (separated by gender)
TIIGH SCHOOLS	Components: Interactive discussion, videos, games, role-plays.
	Evaluation findings: At the 12-month follow-up, reduced initiation of sex, and reduced unprotected sex.
	Information: http://www.etr.org/recapp/index.cfm?fuseaction=pages.ebpDetail&PageID=2
	http://www.etr.org/tppi/products/bart.html
	HHS fact sheet:
	http://www.hhs.gov/ophs/oah/prevention/research/programs/becoming a responsible teen.html
Children's Aid	Cost: The program costs approximately \$4,750 per teen per year to implement.
Society (CAS) –	Audience: Low-income adolescents.
Carrera Program	Main Message: The CAS-Carrera Program is an intensive, year-round, multi-year after-school program that is
Carrera Program	designed to promote positive youth development and positive reproductive health. At-risk youth enter the
	program at age 13-15 and participate through the end of high school. The program employs a holistic approach—
✓ Community-	addressing the various contexts and needs relevant to the participants' lives—and it provides a wide variety of
based settings	activities and services.
buseu settings	Length: Year-round services available 5-6 days/week through the end of high school.
	Components: Job club, academic assistance, family life/sex education, self-expression, lifetime individual sports,
	comprehensive medical care, mental health services.
	Evaluation Findings: At the end of the multi-year program, girls in study were 18% less likely to have had sex than
	girls in control group, were 55% less likely to become pregnant, and were 80% more likely to use dual methods of
	contraception at last sex. Not yet shown to be effective for boys on sexual health measures.
	Information: http://stopteenpregnancy.childrensaidsociety.org/
	Description: http://www.childtrends.org/Lifecourse/programs/CAS-Carrera.htm
	HHS fact sheet: http://www.hhs.gov/ophs/oah/prevention/research/programs/cas_carrera.html
¡Cuídate!	Cost: Facilitators Curriculum \$165, Implementation Manual \$75, Training of Facilitators Manual \$145. Student
Cuidate:	workbooks available soon.
	Audience: Latino teens 13-18 years/ grades 8-11
✓ Community-	Main Message: ¡Cuídate! incorporates salient aspects of Latino culture, including the importance of family and
based settings	gender-role expectations (e.g., machismo, which is described as the man's responsibility in caring for and
✓ afterschool	protecting one's partner and family). These cultural beliefs are used to frame abstinence and condom use as
✓ Middle schools	culturally accepted and effective ways to prevent sexually transmitted diseases, including HIV.
✓ High schools	Length: Six 60-minute modules delivered over two or more days.
Tilgii schools	Group Size: Small (6-10) mixed-gender groups
	Components: Learning activities such as small group discussions, videos, games, music, hands-on practice
	demonstrations, and role-plays. May be conducted in either English or Spanish.
	Evaluation Findings: 12 months after end of program, participants were less likely than control group to have had
	sex in the past three months, multiple partners, or unprotected sex, and more likely to have used condoms
	consistently than comparison group. Program most effective with Spanish-speaking teens.
	Information: http://selectmedia.org/customer-service/evidence-based-curricula/cuidate/

	Timo race sinced. http://www.niis.gov/opiis/oaii/prevention/research/programs/culuate.ntmi

Draw the	Cost: ETR: \$56 program manuals (3 grades), \$21 individual grade level pieces
Line/Respect the	PASHA package: \$216 (includes telephone technical support for 1 year).
Line	Audience: Latino or multicultural junior high school students, grades 6 through 8. This program can be used for
	both boys and girls but is more effective for boys.
	Main Message: The program covers setting limits, social pressures, challenges to personal limits, and
✓ Middle schools	communication and refusal skills. In 6 th grade, focus is on setting limits in non-sexual situations. The aim of the
	program is to reduce the number of students who initiate or have sexual intercourse, and to increase condom use
	among students who are sexually active.
	Length: 20 lessons given 6 th through 8 th grades. Designed to fit into classroom sessions of 45-50 minutes.
	Group Size: Classroom
	Components: Separate classroom modules for each grade, teacher consultations with students individually or in
	small groups, parent homework.
	Evaluation Findings: At one year follow-up, program reduced initiation of sex for boys; boys also had sex less
	frequently and with fewer partners than boys from control schools. No impact on condom usage. These outcomes
	not shown with girls.
	Information: Purchase: ETR: http://pub.etr.org/ProductDetails.aspx?id=10000&prodid=S028

FOCUS: Preventing	Cost: \$315 (download); \$420 (print), purchase: www.socio.com
Sexually	Audience: Young women age 17-22
Transmitted	Main Message: Designed to prevent STDs and unintended pregnancies among young women, the program seeks
Infections and	to increase knowledge about pregnancy, STDs, and contraceptives, and to modify attitudes and build skills that
Unwanted	impact sexual behavior. Some content is graphic. Not intended for younger teens.
Pregnancies among Young Women	Length: Four 2-hour sessions. May be implemented in shorter segments. Group Size: 20-25
Tourig Worlien	Components: Lecture, discussion, exercises, self-risk appraisal, videos.
✓ Clinics	Evaluation Findings: At the 14-month follow-up: participants in the intervention who were sexually inexperienced
✓ Community-	at baseline were significantly less likely to report having had multiple sex partners after the intervention; also had
based settings	fewer STDs than comparison group.
basea settings	Information: http://www.socio.com/srch/summary/pasha/full/passt22.htm
	HHS fact sheet: http://www.hhs.gov/ophs/oah/prevention/research/programs/focus.html
HIV Risk Reduction	Cost: Program materials are available by contacting Angela Bryan, Ph.D., University of New Mexico, at
Among Detained	abryan@unm.edu .
Adolescents	Audience: High-risk adolescents in juvenile detention facilities
	Main Message: This single-session, group-based intervention is designed to reduce sexual risk behaviors, including
✓ Residential	alcohol-related sexual risk behaviors, and increase condom use.
settings (youth	Length: One 4-hour session
detention)	Group Size: small group (up to 10)
	Components: 3-hour, small group session with activities, videos, video game, condom demonstration; followed
	immediately by 1-hour discussion addressing alcohol use and sexual activity.
	Evaluation Findings: At the six-, nine-, and twelve-month follow-ups, adolescents participating in the intervention
	reported more consistent condom use. The evaluation study was conducted with a diverse, predominantly male
	group; mean age 15.8 years.
	Information:
	HHS fact sheet: http://www.hhs.gov/ophs/oah/prevention/research/programs/hiv_risk_reduction.html
HORIZONS	Cost: Program materials are available by contacting Ralph DiClemente, Ph.D., Emory University Rollins School of
/ Clinian	Public Health at rdiclem@emory.edu .
✓ Clinics	Audience: African American females age 15-21 seeking sexual health services Main Massage: The intervention aims to reduce STDs by improving STD/HIV rick reduction knowledge and condem
✓ Community-	Main Message: The intervention aims to reduce STDs by improving STD/HIV risk-reduction knowledge and condom
based settings	use skills, facilitating communication with male partners about safer sex practices and STDs, facilitating male sex partners' access to STD screening and treatment, and reducing female adolescents' frequency of douching.
	Program also seeks to foster a sense of cultural and gender pride and emphasize the diverse individual and social
	factors contributing to adolescents' STD/HIV risk.
	Length: Two 4-hour sessions, implemented on 2 consecutive Saturdays
	Group Size: Small groups
	Components: Interactive group sessions, vouchers for male partners toward cost of STD services, follow-up
	telephone calls to reinforce prevention information. (cont.)
HORIZONS, cont.	Evaluation Findings: At 6- and 12-month follow ups, participants less likely to test positive for Chlamydia and more

Project TALC (Teens	Cost: Free – available online: http://chipts.ucla.edu/interventions/manuals/intervhra1.html
and Adults Learning	Audience: Adolescent children of parents with HIV (ages 11-18)
to Communicate)	Main Message: This program is designed to provide coping skills to parents living with HIV and their adolescent
to Communicate)	
	children. For the parents, the goal is to reduce emotional distress and problem behaviors, such as substance use.
(For the children, the goal is to reduce emotional distress, problem behaviors, and teenage parenthood.
✓ Community-	Length: Delivered once a week over 4-6 years, on Saturdays in local community centers.
based settings	Group Size: Small groups
	Components: 1) 8 sessions for parents alone, 2) parents and adolescents together, 3) additional sessions for
	adolescents whose parents have died and their caregivers
	Evaluation Findings: At the four-year follow-up (from program start): adolescents participating in the intervention
	were significantly less likely to report being a teenage parent. Evaluation study was conducted with a
	predominantly Latino and African American group.
	Information:
	HHS fact sheet: http://www.hhs.gov/ophs/oah/prevention/research/programs/project_talc.html
Promoting Health	Cost: Program is not yet available (as of August 2010). Cost will be \$145 for basic package, \$513 full package.
Among Teens!	Audience: Youth in grades 6 and 7 from low-income urban communities. (Note: evaluated only with African
Abstinence-Only	American youth).
Intervention	Main Message: This abstinence-only program for younger adolescents provides only medically accurate
	information, avoids moral judgments, and does not promote abstinence-until-marriage. Promotes abstinence as a
	positive choice and the best way to avoid pregnancy and HIV/STDs, focuses on goals and dreams, builds refusal
✓ Middle schools	skills.
✓ Community-	Length: Eight 1-hour modules delivered on 2 consecutive Saturdays
based settings	Group Size: Evaluated with small groups
	Components: Group discussions, videos, games, brainstorming activities, skill-building, and experiential exercise.
	Four modules encourage abstinence, and four cover general HIV/STD knowledge
	Evaluation Findings: At 24-month follow-up, sexually inexperienced participants less likely than control to initiate
	sex. Based on average of follow-ups, participants less likely to have sexual intercourse.
	Information: http://www.selectmedia.org/customer-service/evidence-based-curricula/promoting-health-among-
	teens/
	HHS fact sheet: http://www.hhs.gov/ophs/oah/prevention/research/programs/promoting-health.html
Promoting Health	Cost: Program is not yet available (as of August 2010). Cost will be \$145 for basic package, \$588 full package.
Among Teens!	Audience: African American, Latino and white adolescents, ages 13-18. (Note: evaluated with African American
Comprehensive	youth only).
Abstinence and	Main Message: This comprehensive abstinence and safer sex intervention provides youth with information about
Safer Sex	abstinence, safer sex practices, pregnancy prevention, and the prevention of HIV and STDs.
Intervention	Length: 12 modules delivered over 2 or 3 consecutive Saturdays
	Group Size: Evaluated with small groups
	Components: Group discussions, videos, games, brainstorming activities, skill-building, and experiential exercise.
✓ Middle schools	Four modules encourage abstinence, four encourage condom use, and four cover general HIV/STD knowledge
✓ High schools	Evaluation Findings: Participants less likely than control group to have multiple partners.

	HHS fact sheet: http://www.hhs.gov/ophs/oah/prevention/research/programs/reducing the risk.html
Rikers Health	Cost: \$115 (download); \$234 program package; www.socio.com
Advocacy Program	Audience: High risk youth, 16-19 years of age, particularly drug users and youth in correctional facilities
	Main Message: The program features a "Problem-Solving Therapy" approach, which focuses on problem
✓ Residential	orientation, defining and formulating a problem, generating alternative solutions, decision making, and
settings (youth	implementing a solution.
detention)	Length: Four 1-hour sessions over two weeks
✓ Community-	Group Size: 8 (single sex recommended)
based settings	Components: Small group sessions focusing on health issues, particularly HIV/AIDS. (Note: evaluated only in youth
	detention setting.)
	Evaluation Findings: Increased condom use
	Information: http://www.socio.com/passt10.php
	HHS fact sheet: http://www.hhs.gov/ophs/oah/prevention/research/programs/rikers health advocacy.html
Safer Sex	Cost: Program materials are available by contacting Lydia Shrier, MD, MPH, Director of Clinic-based Research,
	Division of Adolescent/Young Adult Medicine, Children's Hospital Boston at Lydia.Shrier@childrens.harvard.edu.
	Audience: High-risk female adolescents
✓ Clinics	Main Message: This clinic-based intervention is intended to reduce the incidence of STDs and improve condom use
	among high-risk female adolescents. It is delivered to participants individually in a clinic by a female health
	educator. Participants are invited back for booster sessions.
	Length: One 40-minute session, followed by booster sessions at one, three, and six months.
	Group Size: Individual
	Components: Video, educational session, booster sessions; standardized intervention manual
	Evaluation Findings: Reduced multiple concurrent sexual partners
	Information: Lydia.Shrier@childrens.harvard.edu
	HHS fact sheet: http://www.hhs.gov/ophs/oah/prevention/research/programs/safer_sex.html
SiHLE	Cost: \$294 program package, \$160 (download); www.socio.com
	Audience: Sexually experienced African American teenage women.
	Main Message: Through interactive discussions, the intervention emphasizes ethnic and gender pride, and
✓ Clinics	enhances awareness of HIV risk reduction strategies. Through the use of role plays and cognitive rehearsal, the
✓ Community-	intervention enhances confidence in initiating safer-sex conversations, negotiating for safer sex, and refusing
based settings	unsafe sex encounters.
	Length: Four 3-hour sessions for a total of 16 contact hours
	Group Size: Small group (10-12 girls)
	Components: Demonstrations, group discussion, lectures, role plays
	Evaluation Findings: At 6-month follow-up, participants less likely to report a pregnancy. At 12-month follow-up,
	participants more likely to report consistent condom use.
	Information: http://www.socio.com/srch/summary/pasha/full/passt23.htm

Sisters Saving	Cost: Not yet available. List price: \$453 full package with videos, \$145 basic package, \$21.25 student workbooks
Sisters	(set of 5)
	Audience: Sexually active Latina and African American female adolescents, recruited from family planning clinics; ages 12-19
✓ Clinics	Main Message: Program addresses beliefs relevant to HIV/STD risk reduction, illustrates correct condom use, and
✓ Community-	depicts effective condom use negotiation.
based settings	Length: One 4½ hour session
	Group Size: 2-10
	Components: Group discussions, videotapes, games and exercises
	Evaluation Findings: Reduced unprotected sex and number of sex partners; lower numbers of positive STD tests
	than control group.
	Information: http://www.selectmedia.org/customer-service/evidence-based-curricula/sister-saving-sister/
	HHS fact sheet: http://www.hhs.gov/ophs/oah/prevention/research/programs/sisters_saving_sisters.html
Teen Health Project	Cost: \$370 (program package), \$220 (download); www.socio.com
	Audience: Adolescents age 12-17 (originally designed for those living in low income housing development)
✓ Community-	Main Message: This HIV-prevention intervention is designed to reduce sexual activity, increase condom use and
based settings	negotiation skills, and enable participants to reduce risky sexual behaviors. The program consists of adolescent and
	parent workshops, as well as a community-based teen leadership council. Length: Teens: two 3-hour sessions followed 4 months later by two 90-120 minute sessions. Parents: One 90-
	minute session. Community leaders: weekly 90 minute meetings for 6 months.
	Components: Adolescent workshops, formation of teen leadership council that organizes community activities,
	parent workshop.
	Evaluation Findings: Compared to control group, increased abstinence and condom use.
	Information: http://www.socio.com/passt25.php
	HHS fact sheet: http://www.hhs.gov/ophs/oah/prevention/research/programs/teen_health_project.html
Teen Outreach	Cost: Program material available through the Wyman Center; facilitator certification and license fees required;
Program [™]	estimated cost per student \$620; start up package: \$26,000.
	Audience: Urban, suburban, and/or rural high school youth at risk of teen pregnancy, academic problems, and
	school drop-out; ages 12-18. Most effective with ethnic minority youth, adolescent mothers, and students with
✓ School and	academic difficulties.
community	Main Message: This youth development program is designed to prevent adolescent problem behaviors by helping
(integrated	adolescents develop a positive self-image, effective life management skills, and achievable goals. Engages young
components;	people in a high level of community service learning that is closely linked to classroom-based discussions of future
used in both	life options.
middle and high	Length: Weekly classes and service learning project throughout the academic year Group Size: Classroom
schools)	Components: Community service, classroom activities
	Evaluation Findings: At program completion, participants had half the percentage of pregnancies as the control
	group.
	Information: http://www.wymancenter.org/wyman_top.php
	http://www.childtrends.org/Lifecourse/programs/TeenOutReachProgram.htm
	HHS fact sheet: http://www.hhs.gov/ophs/oah/prevention/research/programs/teen_outreach_program.html
What Could You	Cost: \$198 (program package), \$120 (download)
Do?	Audience: Female high school students with previous sexual experience
	Main Message: This interactive video intervention is aimed at increasing young women's ability to make less risky
	sexual health decisions. The video includes vignettes during which viewers are presented with specific options to
✓ Clinics	choose from related to sexual behaviors.
✓ Community-	Length: One session of approximately 45 minutes.
based settings	Group Size: Individual
	Components: Interactive video
	Evaluation Findings: At 3-month follow-up, increased abstinence; at 6-month follow-up, decreased positive STD
	diagnosis. (Note: in evaluation, initial session was followed by booster sessions at 1, 3, and 6 months.)
